PROFILE

As a **Full Stack Developer**, I bring a strong foundation in a wide range of technologies and a passion for creating innovative web applications. I am always open to new opportunities and value constructive feedback, eager to contribute my problem-solving skills and collaborate with a dynamic team to drive digital solutions and enhance user experiences.

KEY PROJECTS

Dynamic Dashboard (Group Project)

2023

Stack: TypeScript, JavaScript, CSS, HTML, DockerFile, Procfile

- I led a five-person team in building a dynamic dashboard with customizable widgets, drag-and-drop functionality, widget management, highlighting our strong teamwork.
- As the **Scrum Master**, I effectively facilitated Agile processes, organized daily stand-up meetings, ensured the team's adherence to sprint goals, contributing to the successful development and delivery of our dynamic dashboard project.
- In the project, I set up the weather API on the back-end, displayed the weather widget on the front-end, and implemented a timer widget, showcasing my versatility in development and design.

To Do List

2023

Stack: TypeScript, JavaScript, HTML, SCSS, Dockerfile, Procfile

- Designed and developed a custom to-do list application using TypeScript as the primary stack, seamlessly integrating Auth0 for user authentication, allowing users to effortlessly add and remove tasks.

Personal Blog

2023

Stack: HTML, CSS

- A personal blog that authentically reflects my identity, values, and the insightful lessons gleaned throughout my coding journey at Dev Academy.

EDUCATION

NZQA Level 6, Full Stack Web Development,
Dev Academy Aotearoa

Jun 2023 — Oct 2023

Dev Academy's 17-week coding course provided 800 hours of intensive coding training, equipping me with a strong foundation in

LANGUAGES

English

Korean
